SUMMARY

Software developer with **3+ years** of experience building production products end to end — React and Node.js on the web, React Native and Kotlin on mobile, and Rust on the desktop. At Razor Infotech I have **single-handedly built four apps** for its HRMS product, three live on Google Play. As a freelancer I built and run **Margo GPS**, a live fleet-tracking platform.

EXPERIENCE

Razor Infotech — Sep 2024 – Present
Software Developer — *New Delhi, India*

- Built the **payroll module as the sole developer**, covering TDS, PF and ESIC with an audit trail behind every figure.
- Owned the **React Native mobile app** (Android and iOS) from first build to Google Play release.
- Independently built **two native Android apps in Kotlin**, both on Google Play: a face-attendance kiosk that works offline, and a field-worker app that shares live location during shifts.
- Built the **Productivity Lens desktop agent in Rust** end to end — it tracks apps, websites, idle time and breaks.
- Built Human Maximizer modules in MERN and Tailwind CSS: attendance, leave, ticketing, POSH and geofencing.
- Built **real-time chat** with WebRTC voice and video calls, and a live company feed over Socket.IO.
- Own GST Billing and built the Restaurant POS in the company's add-on apps.

AVANTI SKG GROUP — Jan 2024 – Sep 2024
Full Stack Web Developer — *New Delhi, India*

- Built and maintained features on **Indimedo**, the group's online pharmacy (like Tata 1mg), in the MERN stack.
- Worked on the catalogue, search, cart and order flows, and the Node.js and Express APIs behind them.
- Built reusable React components that cut feature development time by about **50%**.

Masai — Jun 2023 – Dec 2023
Frontend Developer (Internship) — *Remote*

- Built and fixed features on the **Masai web app** (masai.com) in React and JavaScript, used by Masai's learners.
- Improved frontend performance and load times, contributing to a **40% rise in traffic**.

Raj Pvt Ltd. — Jun 2021 – May 2022
IT Support Technician — *New Delhi, India*

- Fixed hardware, laptop and network issues, set up laptops for staff, and recovered data from failed machines.

PROJECTS

Margo GPS — Fleet Tracking Platform Freelance · Sole developer — margogps.in
Node.js · TCP · MongoDB · Socket.IO · React · React Native (Expo) · Razorpay

- Built and run a live fleet-tracking platform with **5,000+ users, 1,900+ vehicles and 1M+ location updates a day**.
- Wrote a **Node.js TCP server** that decodes six GPS tracker protocols and sends remote engine-stop commands.
- Shipped a React web dashboard and an **Expo app on Google Play and the App Store**, with Razorpay payments.

Personal projects: YouTube Clone · Movie & TV Database · Crypto Dashboard · Myntra Clone

SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, HTML, CSS
Backend	Node.js, Express, REST APIs, Socket.IO, WebRTC, TCP servers, JWT
Mobile & native	React Native, Expo, Kotlin, Jetpack Compose, Rust
Databases	MongoDB, Mongoose, MySQL, SQLite
Tools	Git, GitHub, Postman, Docker, Vercel, Netlify, Razorpay, Firebase

EDUCATION

MERN Full Stack Web Development — Masai (Remote) — May 2022 – Apr 2023
BBA — Bharati Vidyapeeth Deemed University, New Delhi — Jul 2017 – Aug 2020
